

MobileHerd

Data on the Hoof - Collecting Herd Management Data amongst the Cows.

If you want a quick, simple and easy way to add events and view animals in your herd, then look no further.

Mobile Herd is a service which has been created to allow farmers and users to access animal data and record information on the go.

MobileHerd

MobileHerd Iphone App:-

- Securely download herd information to your iphone
- View animal records at the touch of a button
- Add individual animal events, as they happen
- Links to breed societies and BCMS, are available
- Synchronise MobileHerd data, with central database
- View day to day reports for animals which are due to
calve, serve, PD or dry off
- Internet connection is only required for synchronisation
- Available for free on the iPhone from the App Store
